

Complete the decision tree

Format: match the branches • Time: 5 minutes • Answer in the chat

Recap. Each conditional artefact hangs off one trigger. Answer the trigger, and the artefact underneath it is owed. Reading the tree is matching a leaf to its condition.

Four triggers, each owing one artefact. Three are blanked below.

Fill the three blanks

Match each blanked leaf to the right artefact from the bank. The rightmost leaf (registry entry) is already shown, so you only fill blanks 1, 2 and 3.

Blank	The trigger above it
1	agent ACTS?
2	output is PROBABILISTIC?
3	decisions still OPEN?

The bank

- p

 Open-decisions log
- q

 Autonomy spec
- r

 Rollback runbook
- s

 Statistical acceptance plan
- t

 Tool contract

Two bank options fit no blank. You do not have to name them, but you should not use them.

How to answer. Type your matches, for example 1 - p 2 - q 3 - s .
